I want to become a chiropractor because I love helping people feel better without relying too much on medicine. The idea of using natural methods to promote health and ease pain is fascinating to me. I also like that chiropractors get to work closely with patients, understanding their needs and providing personalized care. My career goal is to learn everything I can about the human body and how to treat it gently and effectively. By setting clear goals, like studying hard in school and gaining practical experience, I believe I can become a skilled chiropractor who makes a real difference in people's lives.
